

NMRA Recommended Weights for HO Scale Cars
1oz + 1/2oz per inch of car length

Example: a 6" long freight car should weigh 4oz.

(Revised March 23, 2025)

Car Length in Feet

Place "Car Body" upright on chart
with one end at "0" to determine
how much the car should weigh

**NOTE: When printing this document,
set PRINTER to "Actual Size" for a
correctly sized document.**
